DETAIL AND SUBMITTAL SHEET

9500 Series - Floor Control and Test Module

Project/Location: _____

Date: _____

Architect/Engineer: _____

Qty: _____

Contractor: _____

Appropriate Selection

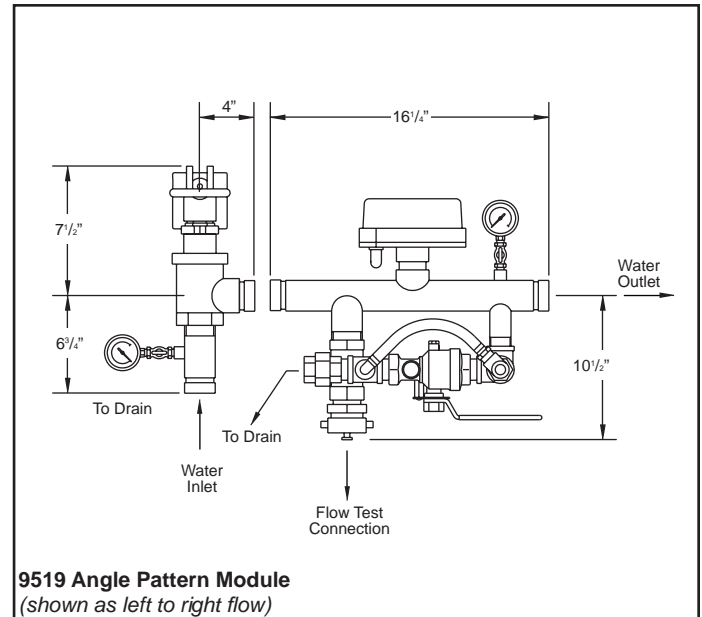

Function: Provide zone control for sprinkler line.

Testing: Pressure Regulating Valves can be flow-tested without shutting down sprinkler system (as per NFPA 25).

Installation: Modules are factory-assembled, effectively reducing installation costs and time.

- 1½" Factory-Set Pressure Regulating Angle Valve with supervisory switch
- Grooved pipe ends
- Water flow detector
- Liquid-filled pressure gauges on inlet/outlet
- 1½" Hose test connection with valve and cap
- Test and drain with pressure relief by-pass
